

R E S U M E

Suleyman M El Cemel

Date & Place of Birth : 11.12.1999 – Hama, Syria
Nationality : Syrian
Marital Status : Married with one child

A Syrian legal professional and architect, he integrates humanities and applied sciences in his research and studies. He studied law and is currently pursuing a master's degree in Public International Law through virtual learning, alongside his studies in architecture and design. Since childhood, he has been interested in web technology, completing training courses, earning international awards, and working temporarily as a professional in the field during his studies.

He believes that combining law, architecture, and practical experience in web technology enables him to design integrated physical and virtual environments, utilizing legal and technical tools such as programming and Building Information Modeling (BIM). He is committed to spreading knowledge in developing countries and contributing to the advancement of digital and physical infrastructure.

Practical Experience

International Suleiman University - Dean of Common Courses - Ankara Center From : 09.2022 To : 06.2025

Researcher and Lecturer Teaching - Research - Administration

He graduated top of his class and was appointed as a teaching and research assistant at the university, where he was entrusted with several administrative responsibilities. Since 2022, he has been responsible for teaching the university-wide core course "Future Leadership," which he has delivered over six academic semesters across all disciplines. In addition to his teaching duties, he has conducted research in public administration, crisis management, and international law.

He also served as a member of the University Quality Assurance Center, contributing to the continuous development and improvement of institutional policies. Furthermore, he was appointed as a supervisor at the university's Information Technology Center, drawing on his strong practical background in programming—having mastered several computer programming languages since childhood. His academic and professional experience uniquely combines both the humanities and applied sciences.

Ostim Industrial Region Foundation - Directorate of Reconstruction and Infrastructure – Ankara/Türkiye From : 01.2022 To : 06.2022

Project Organizer Research - Organization - Presentation

Was offered a job opportunity at the Directorate of Reconstruction and Infrastructure after completing a one-month university internship. Responsibilities included collaborating with urban planners, coordinating projects in accordance with local standards, and submitting them to affiliated institutions. Conducted continuous research and proposed improvements to local standards based on the latest international guidelines.
